

In re Patent Application of  
**DELLMO ET AL.**  
Serial No. 10/806,937  
Filed: MARCH 23, 2004

---

REMARKS

Applicants thank the Examiner for the careful and thorough examination of the present application. The Examiner is also thanked for the telephonic interview of June 3, 2008 where the Examiner agreed that amending the independent Claims to further recite that the user network interface comprises a plurality of different types of connectors for coupling the cryptographic module to different network devices would define over the cited prior art. Neither Dichter et al. or any of the other references teaches or suggests the claimed invention. Accordingly, the independent claims have been amended.

In view of the amendments presented above and agreed to by the Examiner, it is submitted that all of the claims are patentable. Accordingly, a Notice of Allowance is therefore respectfully requested in due course. If the Examiner determines any remaining informalities exist, he is encouraged to contact the undersigned attorney at the telephone number listed below.

Respectfully submitted,

---
